Arseniy Panin

Junior Software Developer

High-energy, highly-motivated, proactive problem solver – looking to cut my teeth in the tech industry. A recently "developed" Bootcamper from School of Code's 16th cohort. Former unregistered barrister, military interpreter, army reservist and full-time turbo-nerd. Coding brings me the same problem-solving joy as playing with LEGO did when I was a child. I am ready to experience the same joy in the workplace.

Hackathons

August 2024
Codefest
Hosted by Sage Technologies
Created a functioning small, bespoke, school children career advice app in a day.

Education

2023
Bar Practice Course and LLM
University of Law Manchester

2019
LLB International Law
 Coventry University

Experience

School of Code February 2024 - Present

Assistant Coach - September 2024

- Supported bootcampers during their breakout rooms sessions. Helped to unblock any tech issues, foster mob-programming mentality, and encourage active problem-solving.
- Observed and assessed bootcampers and provided insightful feedback to other members of staff on their progress,
- Voiced any need for adjustment to the sessions, interventions and generating avenues of support for struggling students making a tangible impact in their tech journeys.
- Assisted in delivering modules for the School of Code by reviewing modules and workshops, providing constructive feedback, and implementing testing for instant feedback for bootcampers.
- Gained a comprehensive experience in education, mentoring, and curriculum development, leaving a lasting legacy on the cohort and the bootcamp itself.

Bootcamper - February - July 2024

- An intense 16-week internship. High-paced, pressurised learning of problem-solving and coding. I was exposed to dozens of new software languages and principle daily e.g Javascript, Typescript, CI/CD, DevOps. AI, cybersecurity, Testing, Data, Agile principles. Covering all aspects of a modern career as a full-stack developer.
- Worked collaboratively and effectively with 16 different teams each week.
- Weekly hackathon challenges: 1.5 days to solidify my learning each week. Delivered at pace consistently to strict deadlines. Effectively managed my time. Learned how to effectively pair/mob program, manage who drives/ navigates and when to swap.
- Put myself out of the comfort zone consistently. Took ownership of my learning.
- Experienced DevOps first hand by hosting my own website through Vercel and Github.

September 2024 - Present

Freelance AI Prompt Writing Consultant - Outlier

- Developed and refined AI-generated content by creating, editing, and reviewing prompts and responses in Russian, for the purposes of training various LLM models, including Gemini AI, GPT-3, GPT-4. CLIP, and many others. Thus enhanced the quality and accuracy of AI outputs.
- Ensured linguistic and factual accuracy by assessing AI-generated text for relevance, coherence, and factual correctness.
- Trained AI for a comprehensive range of purposes such as: natural language processing, image and video analysis, and multi modal AI. Gaining a comprehensive understanding of strength and weaknesses of various LLM models.
- Collaborated with cross-functional teams. Worked closely with AI researchers and developers to provide feedback and improve model performance.
- Utilized expertise in language and writing by leveraging my professional experience in translation, copy writing, and technical writing to produce high-quality content.
- Maintained flexibility and adaptability by successfully managing a remote, freelance role with flexible hours, as well as multiple other professional commitments demonstrating strong self-motivation and time management skills.

Hobbies

- **Running/Gym**
- **Tabletop Roleplaying Games: e.g D&D**
- **Miniature Painting**
- **Video Games**
- **Guitar**
- **Coding/ Attending Hackathon**

Other

SC and CTC Cleared

Projects

Personal Portfolio Site

In the process of making a 3-tier website for my personal use to showcase my work and progress.
Tech stack:
- Front end: React, Next.js, Tailwind, TypeScript
- Back end: Python, Flask, Vercel
- Database: SQLite, Cloudinary,

Key factor in choosing this tech stack was to gain exposure in as many programming languages, web-frameworks, and services as possible. Including cross-resource sharing (CORS), which combined with the 3-tier architecture, has deepened my understanding of how web-applications work, and how each tier interacts with each other. Allowing me to build progressively complicated, reliable scalable software, and becoming a truly tech-agnostic developer.

U-Plot

Tasked by uTrack - a software developer specialising in public transport logistics to develop a bespoke route-planning application for small organisations.

Successfully developed and hosted, a fully-functioning app in under 2 weeks.
Github link: https://github.com/SchoolOfCode/bc16-final-projects-ugegnu

- Organisation: Facilitated and hosted stakeholder meetings. Allocated tasks and wrote tickets on behalf of the team, ensuring the we are on target.
- Leadership: Acted as project manager in a team of 6. Encouraged open discussion, mutual problem-solving. Acted as a source of support, morale, and psychological safety for my team.
- Partook in the creative process of design, ideation, and the UI/UX experience of users. Assisted in the creation of names, and tag-lines, user stories.
- Set up the back end database using Render. Connected API routes and made CRUD operations,
- Made Pages and Route components in React. Wrote key front end functions using JSX.
- Reviewed pull-requests, added branch protection rules. Ensured team uses same version of node.

Previous Career

April 2023 - January 2024

Freelance Ukrainian Interpreter - Ministry of Defence

- Developed outstanding communication skills whilst working in a military hospital by interpreting British clinicians and their host nation counterparts in operational theatres, dressing clinics, and rehab centres.
- Acted as a mouthpiece for senior British officials during highly important diplomatic missions.
- Learned complex medical, military, and specialist terminology and communicated it to laypeople in a more accessible manner.
- Assisted in delivering effective training of recruits ahead of them returning to the frontline

December 2022 - March 2023

Supervising Paralegal, Leigh Day Solicitors , LLP

- Participated in the largest group claim in British history, with over 30,000 claimants.
- Managed and supervised a team of paralegals, and ran training calls on a weekly basis.
- Amended claim forms and identified more than 200 clients in need of amendment.
- Imported client data for over 2,000 clients and sanitised the database.
- Sent quarterly updates to clients, informing them of any subsequent developments in the case and advising them on how it affects their claim.
- Provided general administrative support by reviewing records and drafting various documents.
